Application and scope

Irving College Baptist Church — LG webOS TV version 1.0.1

App ID: church.irvingcollege.icbc | Launcher: Irving College BC

English; United States only; no login, payment or subscription flow.

Support/privacy contact: icbcnextsteps@gmail.com

Prepared for reviewer use; not an official completed LG form or a certification claim.

Browser screenshots are genuine app captures using a read-only production catalog snapshot. They do not prove production CORS or native TV playback.

User reported a visually successful Mac webOS26 simulator launch of 1.0.0. Recheck 1.0.1. No physical LG television has been tested.

Home and primary navigation

Use arrows and OK, or pointer movement and click. The focused control has a visible outline.

Watch Live opens the church HLS stream; Browse Sermons focuses the first archive; Refresh reloads the catalog.

Only Sunday worship is streamed, starting 10:30 AM U.S. Central Time. Other listed meetings are not livestreamed.

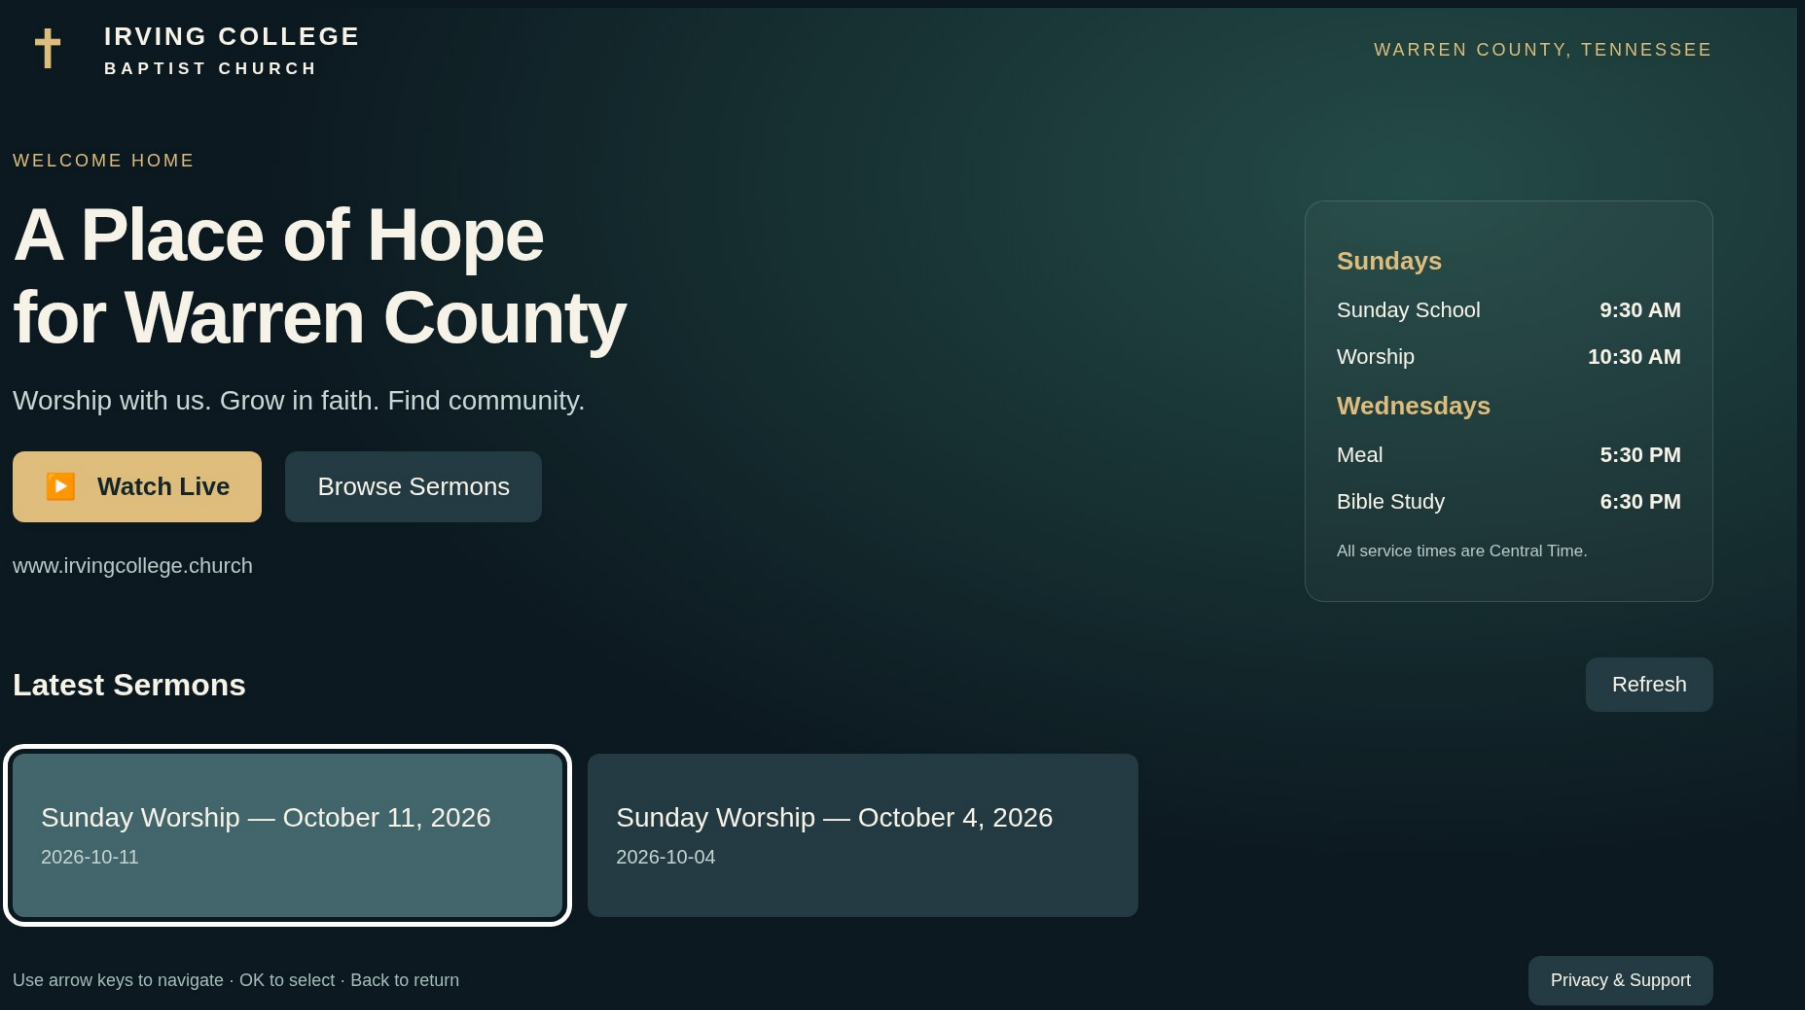

Recorded sermon library

Choose Browse Sermons, navigate the cards and select a title. Cards preserve the live catalog order.

Player controls: Play/Pause, minus/plus 30 seconds for archives, Retry and Back to Home.

Back/Stop closes playback and restores the originating card. A failed Refresh retains existing sermons.

No production video playback is depicted here. Real MP4 ranges/seek/end and native HLS remain hardware checks.

Privacy and support

Choose Privacy & Support from the home footer. Use Back to Home or remote Back to return.

Church-confirmed policy: no retained visitor/IP logs; no account, advertising, analytics or viewing-history storage.

IP/network request details are necessarily processed transiently to deliver the catalog and video.

Public policy and support URLs are in listing.md; contact icbcnextsteps@gmail.com.

Privacy & Support

Irving College Baptist Church · Effective October 19, 2026

This app lets you watch our livestream and sermon library without an account. It has no advertising, analytics, tracking cookies, or viewing-history storage.

When you load sermons or play video, your IP address and requested content are processed by our streaming service to deliver them. The church does not retain visitor or IP access logs for this app.

The app does not request your name, email address, location, contacts, microphone, camera, advertising identifier, or payment information. We do not sell or share app activity for advertising.

If you email us, we use the information you choose to provide to respond. Do not include sensitive information. Contact us about support correspondence or privacy questions at icbcnextsteps@gmail.com.

LG's operating system and app store have their own privacy practices. This policy covers the church's app and streaming service.

Support and privacy contact: **icbcnextsteps@gmail.com**
Website: www.irvingcollege.church

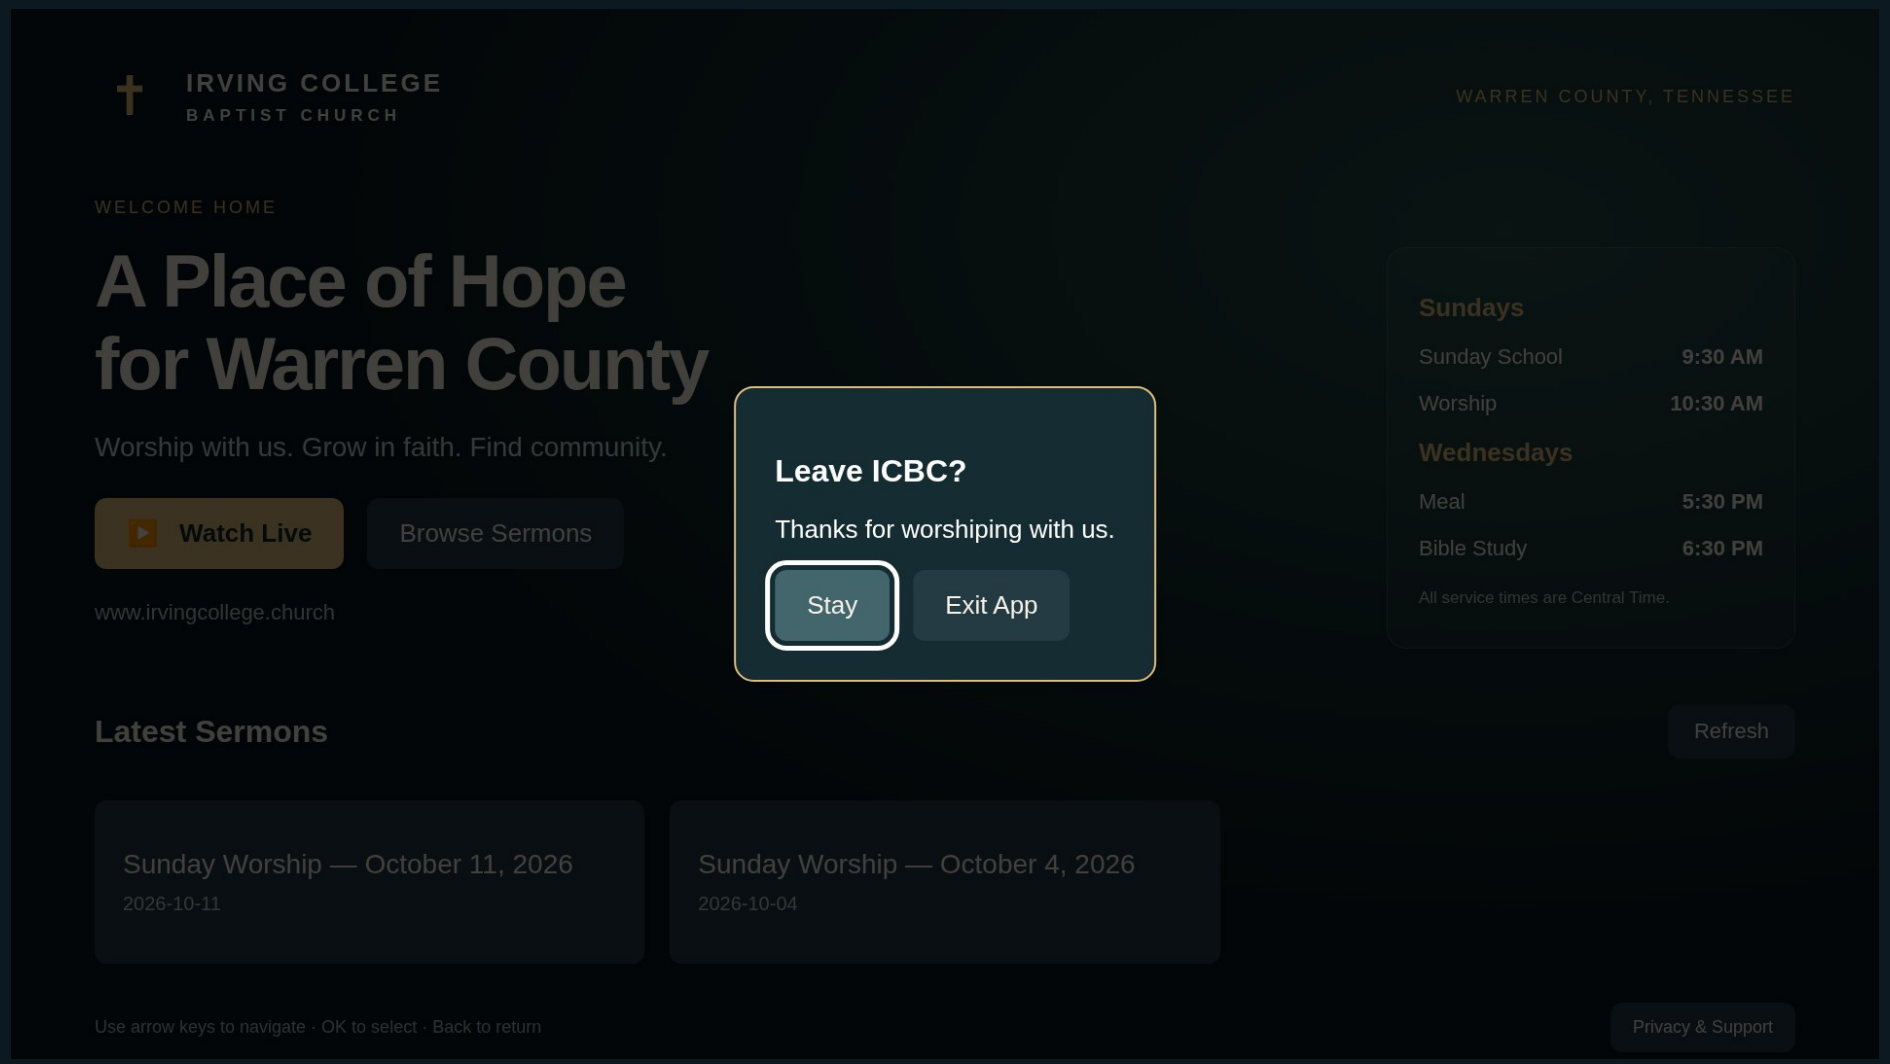

Back to Home

Back and application exit

Player Back returns to the originating screen; archive Back returns to home; privacy Back returns home.

At entry, this candidate shows Stay / Exit App. Stay dismisses; Exit requests window closure.

Remote and native shell exit must be validated on hardware. Check the webOS23–25-specific Home rule in LG’s current checklist before choosing those targets.

Playback, recovery and review windows

Live: https://live.irvingcollege.church/hls/stream.m3u8

Catalog: https://live.irvingcollege.church/sermons/catalog.json

Sunday worship is the only livestream; begins 10:30 AM U.S. Central Time (America/Chicago); duration varies.

Use an archive outside broadcast windows. No test account or external activation is required.

Live seeking is disabled. Startup or stalled playback reaches a recovery message after a bounded wait. Retry reopens the same URL.

Leaving the app pauses media; returning requires Play. Closing playback releases resources.

30 local automated tests pass; evidence logs are included. Fixture playback and mocks are not TV results.

Readiness and owner actions

Prepared: versioned official CLI IPK, checksums, branded assets, listing copy, privacy/support policy, reviewer route and evidence worksheet.

Open: installed-app catalog CORS; native TV live/archive playback; physical remote/lifecycle/exit tests; model-group Back requirement.

Open: current official LG self-checklist/UX template transfer, content/age questionnaire, final model selection and authorized seller declarations.

Church confirms sermon distribution rights, exclusion of music for rights reasons, US-only distribution and no visitor/IP logs.

No production streaming server configuration was changed. No Seller Lounge account was accessed and nothing was submitted.

Use the official forms linked in requirements-sources.md; transfer actual results only.
